The Basque Country - Tenth Region in Spain for Scientific Documents/Inhabitant

The Basque Country (Autonomous Community) came tenth in Spain when comparing the number of scientific documents listed in the ISI Thompson Reuters "Web of Science" database, to the number of inhabitants (INE - National Institute of Statistics).

Ikerbasque researcher: Ugo Mayor

Bilbao, October 2010

Our research will have implications on the understanding of neuronal diseases

IKERBASQUE and CSIC achieve highest number of european research

How has your researcher situation changed since you joined the CIC Biogune as an Ikerbasque researcher?

First of all, in terms of security. A career as a scientist is a process in which for some undefined period of time one has very little certainty of what the future will bring to you and your family, even when your research is successful. Being contracted by Ikerbasque means that I can now focus on the research rather than having to figure out where my next salary will come from. Obviously this will hold true as long as our discoveries are at the forefront of our field, as determined by the periodic evaluations Ikerbasque has in place.

Three IKERBASQUE Foundation researchers secured financing for several other innovative projects through the European Research Council's Starting Grants program, which support young researchers in developing their careers in Europe. Only the Consejo Superior de Investigaciones Científicas (CSIC), Spain's biggest public research body, and which belongs to the Ministry of Science and Technology, achieved the same number of grants, out of a total of 23 Spanish projects selected by the European body.
